

## Khatod PL1672 Series Compatible Light Module introduced by LEDdynamics, Inc.

FOR IMMEDIATE RELEASE

Randolph, VT (May 21, 2019) – **LEDdynamics, Inc.** announces the introduction of the Centaurus J006 Light Module.

The Centaurus J006 high-power light module was designed to interface with the Khatod PL1672 Series optics and can be equipped with CREE's XP-E2 and XP-G3 Series LED's.

"Using a metal core PCB, the Centaurus J006 is electrically isolated. The Khatod PL1672 lenses can mount directly to the PCB or be mechanically mounted with a lens holder. The combination of these two products make integration into luminaires simple and straightforward" shared Daniel Yasi, Jr. Vice President of Sales.

"Working with LEDdynamics the Centaurus star board was engineered to be compatible with the entire family of 35mm lenses. The PL1672 beam patterns are an ultra-narrow 3.5°, a narrow 10°, a medium 28°, and an elliptical 12°x18°. Ease of integration combined with a comprehensive lenses portfolio means that luminaire designers can rapidly bring their products to market" shared Paul Fielder Director of Sales for Khatod North America.
